

Flinders St Station External Façade Lighting Upgrade

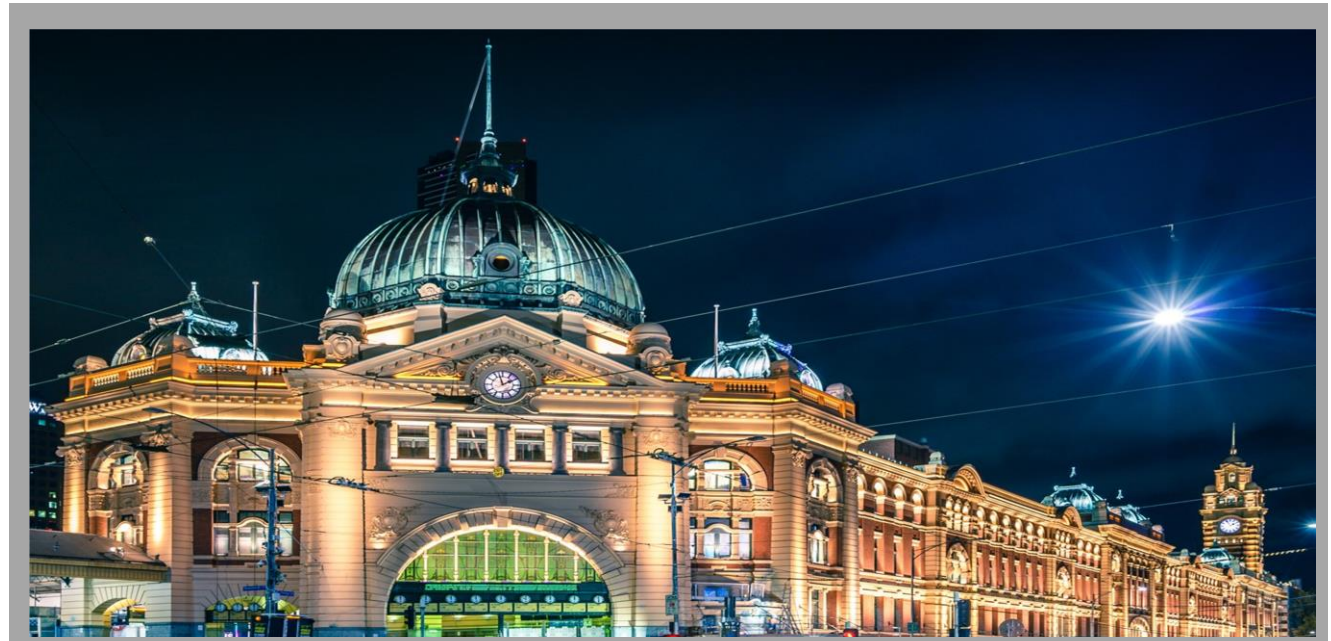

APEC were engaged under a full D&C Contract to assemble and lead a team of experienced Façade Lighting Professionals to deliver a feature LED Lighting Platform to one of the most iconic heritage listed buildings in Melbourne; The Flinders St Railway Station.

APEC partnered with Darkon Lighting, Lumascope & Aston Consulting under the direction of Head Contractor Built to deliver this state of the art LED Lighting Installation. One of the many innovative features is a Bi-Directional Self Health Monitoring Communication System used to monitor the client's significant investment.

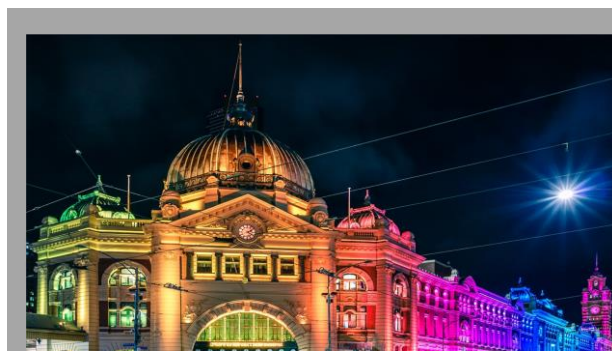

Taking Technology to a new level to deliver amazing themed static and dynamic light shows whilst maintaining the heritage aspect of this iconic landmark were part of the challenges that the project team overcame.

The installation is driven by a complex Madrix Head End Software Platform that connects DMX Nodes via an Optic Fibre Backbone Network.

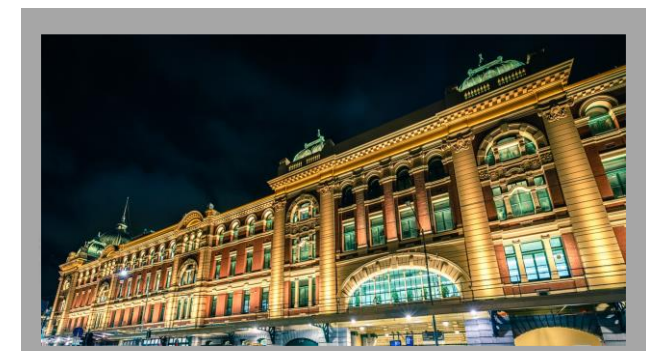

Project Value: \$6M
