

## Interactive Data Centre

APEC completed this High-End Data Centre for Interactive as the Client

This project entailed a Design and Construct element working closely with the Consulting Engineers in areas such as Electrical Supply Arrangement, Quad Redundancy Back Up Power Systems, Switchboards, Submain Sizing Calculations and the complete Communications Infrastructure.

Challenges that were successfully designed and accomplished included the Integration of Building Services including but not limited to Electrical, Communications, Fire, Security, Generators, UPS and Mechanical Services that were all linked to the clients BMS System delivering “Real Time” status and alert notifications for the mission critical services within this state of the art Data Centre.
