

MYOB Head Office

APEC were awarded the Electrical and Communication Package for the MYOB Head Office Fitout in Cremorne, Melbourne. MYOB are a repeat client for APEC after having previously being involved in the refurbishment of their previous office space, 6 Years earlier.

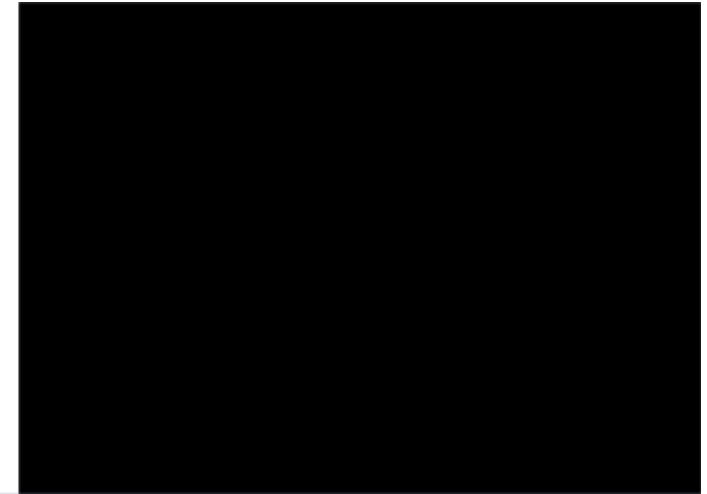

This space consisted of 4 levels of exposed ceiling sprayed with vermiculite fire spray. This meant that exposed fixings for light fittings, cable supports and communications equipment had to be installed prior to the spray being applied with all final connections being post spray. In-depth planning was required to accomplish this challenge.

APEC installed R&M as the Cat6A & Fibre Optic Communications Vendor for this project and a Wireless Access Point network was also installed, with MYOB being a software company the reliability of IT Network was a critical element of this project.

APEC were delighted to be shortlisted as a preferred contractor by MYOB which led to our ultimate engagement to complete this project.
